PROFILE

I am passionate about designing and implementing scalable, user-centric solutions that bridge the gap between front-end interfaces and back-end systems. My goal is to contribute to innovative projects that leverage my expertise in full-stack development to drive seamless digital experiences and impactful business outcomes

EXPERIENCE

ARTIFICIAL INTELLIGENCE COMMUNITY OF PAKISTAN •
JUNE 2024- SEP 2024

FRONTEND WEB DEVELOPER

I completed a four-month online summer internship specializing in front-end web development, where I honed my skills in creating responsive and interactive user interfaces. During this period, I gained hands-on experience with technologies like HTML, CSS, JavaScript, and modern frameworks such as React. I successfully contributed to real-world projects, ensuring cross-browser compatibility and optimizing performance. This internship enhanced my ability to deliver visually appealing and user-friendly web solutions.

123 E-FILING, UNITED KINGDOM
OCT 2024 TILL NOW

BACKEND WEB DEVELOPER

I completed my second internship at 123 E-Filing, where I worked closely with the customer chat support team to address user queries and provide efficient solutions. Alongside this, I contributed to backend development tasks, enhancing system functionalities and ensuring seamless data flow. This dual role strengthened my problem-solving abilities and provided valuable experience in both customer interaction and technical development. It also deepened my understanding of balancing user needs with backend processes.
